

## LIQNET is a cryptocurrency exchange with the unique liquidity pooling technology

that aggregates liquidity from various platforms and solves the problem of the splitting of users and their requests and orders. LIQNET forms a unified order book with the best market depth and best prices for representatives of various jurisdictions

Official site:

<https://liqnet.com>

More information at:

<https://liqnet.io>

### Our mission

The joint LIQNET exchange solves the problem of splitting liquidity in the market of cryptocurrencies. With the help of the LEN (Liquidity Exchange Network) mechanism, our platform collects and consolidates orders from different cryptoexchanges, forming a single order book with unified liquidity. This means that on LIQNET you can trade in large volumes and with greater profit than on individual exchanges.

### Advantages of the project

**Increased liquidity** compared to individual exchanges

**The best opportunities** to close large deals, increase profits of traders

**A single interface** for trading on many exchanges

**New prospects** for the whole market, support of the industry

**Special benefits** in trading for holders of LEN tokens

**Tools for scalping trading, market-making, etc.** A graph with a multitude of tools for technical analysis

### Benefits of the token holders

The discount on the commission of the exchange is up to 90%, depending on the number of tokens spent on it

Access to the voting service to decide on a number of key issues, such as choosing trading pairs and ways to spend collected commissions

The opportunity for investors to enter the market of cryptocurrency exchanges and services through a ready-made thought through project

The potential growth of the market price of the LEN token

### Terms of sale of tokens

**1 LEN = \$1**

SOFT CAP

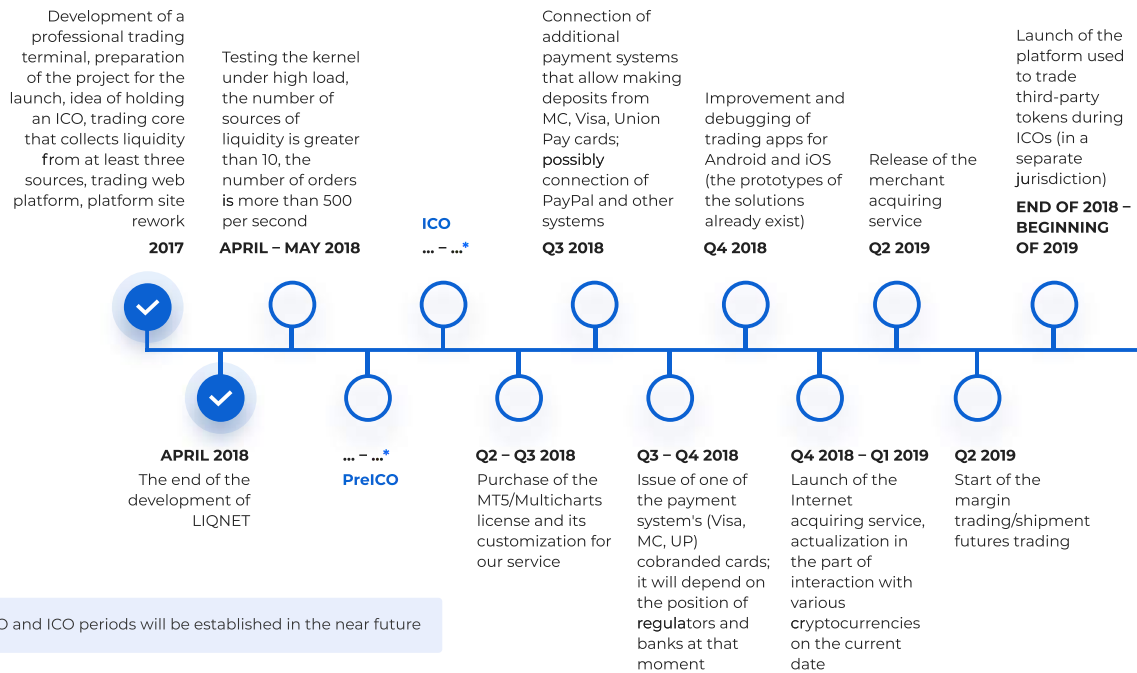

**\$20 000 000**

HARD CAP

**\$50 000 000**

## Road map

## Bonus

In the first three days the investors will get an additional 40% bonus, in the following three days — 20%, in the following four days — 10%. Then tokens will be sold without bonuses.
